Executive Summary

PROJECT OVERVIEW

USDG Gold (USDGold) is positioned as a multi-chain digital asset and gaming-rewards ecosystem. The project combines token infrastructure, Telegram Mini Apps, lottery participation, referral growth, social reward mechanics and public security documentation into one ecosystem narrative.

50B

fixed token supply

4

supported networks

Vision & Mission

STRATEGY

Vision

To build a transparent, community-driven blockchain ecosystem where token utility is connected to real user participation, gamified rewards, weekly competitions and verifiable security documentation.

Mission

- Create engaging Telegram-based products around USDG Gold.
- Connect USDG Fortuna, USDG Tap and future reward utilities into one coherent ecosystem.
- Maintain multi-chain accessibility across Ethereum, BNB Chain, Arbitrum and TRON.
- Publish contracts, audits, security notes and official links for public review.

USDG Gold identity

Market Problem & USDG Gold Solution

MARKET

Market Problems

Many token projects struggle to show real user engagement, clear utility, transparent documentation and active product development. Users often see only a chart, a contract address and a Telegram group.

USDG Gold Solution

USDG Gold connects token infrastructure with live community products: Fortuna wheel, weekly lotteries, Tap-to-Earn, social missions, referral systems, audit evidence, Blockaid review confirmations and GitHub documentation.

Positioning

USDG Gold should be presented not only as a digital token, but as a multi-chain gaming and rewards ecosystem with public documentation, live application screenshots and measurable operational activity.

Ecosystem Architecture

CORE COMPONENTS

USDG Gold Token

Multi-chain asset layer for the ecosystem.

USDG Fortuna

Wheel, points, bonus spins, premium spins and weekly lotteries.

USDG Tap

Tap-to-Earn onboarding and future holder-based access model.

Community Growth

Telegram, X, social tasks, referrals and campaigns.

Security Layer

Dessert Finance audits, Blockaid false-positive review resolution and verified contracts.

Transparency Layer

GitHub repositories, official links, dashboards and public communication.

Multi-Chain Infrastructure

CONTRACTS

Network	Official Contract	Standard
Ethereum	0x3C89DF6C17Ca5c735498712d343387198e573383	ERC-20
BNB Chain	0x5b6d884174853f2c2d1a98b406c3b44f411d3cbc	BEP-20
Arbitrum	0x82248D53De2B7608cAF53978A8E8C238DC42403a	ARB
TRON	TWdoRngam67skhdVtcCaHKaRD5bFRIs26S	TRC-20

Users, exchanges and wallet platforms should verify contract addresses only through official project channels before interacting with any asset. Contract data and market metrics may change over time.

Tokenomics

SUPPLY AND DESIGN

50,000,000,000

maximum supply

18

decimals

0%

transfer tax

No

mint / pause / blacklist

Contract Design

According to the audit materials supplied for the BNB Chain and Ethereum deployments, the token model is built around fixed supply architecture, verified source code, no mint functionality, no pause mechanism, no blacklist or whitelist restrictions, no sell-condition logic and no transfer tax or fee logic.

Utility Design

USDG Gold is intended to support ecosystem participation, community rewards, future staking initiatives, premium products, game-related activity, campaign participation, exchange listings and long-term brand expansion.

Token Economy Model

UTILITY

Ecosystem Utility

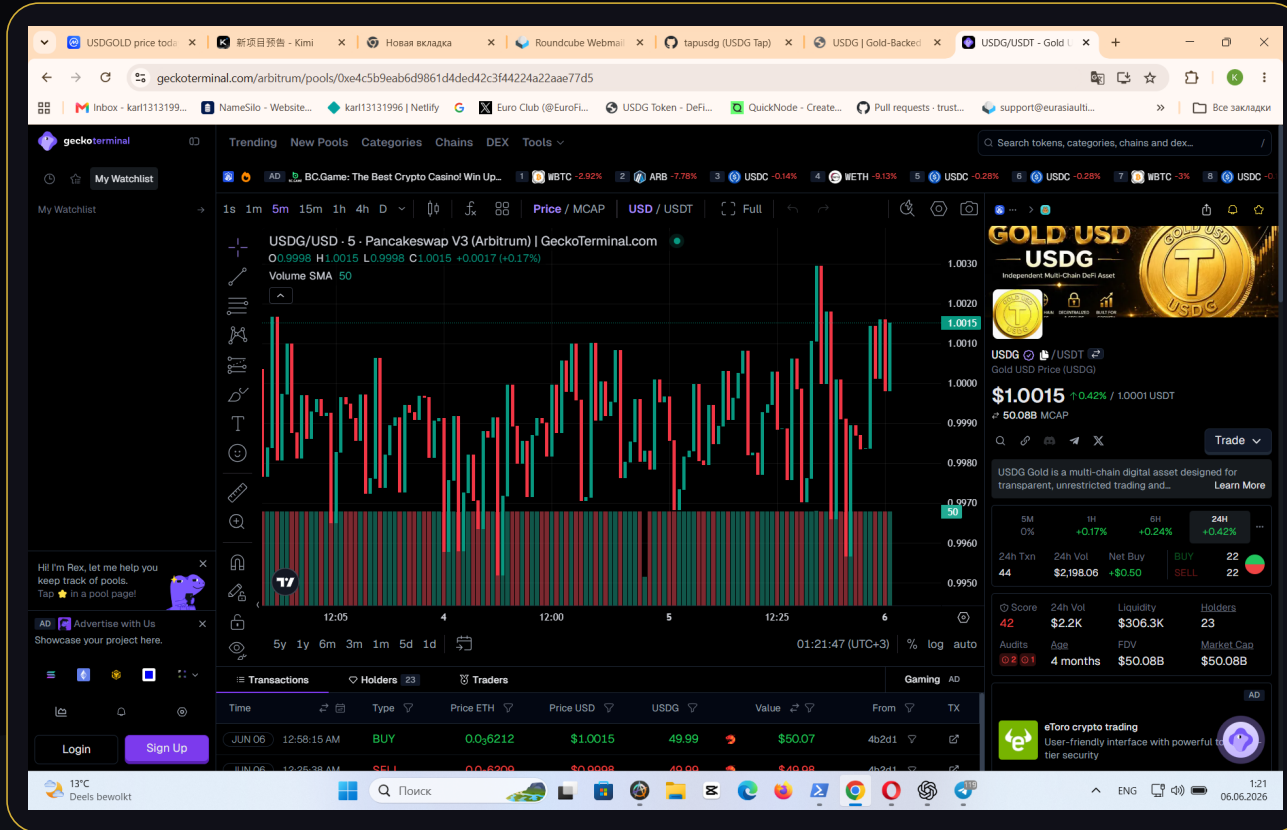

- Participation in USDG Gold ecosystem products and future utility modules.
- Connection to USDG Fortuna premium products, paid entries and community campaigns.
- Future relationship with USDG Tap holder-access conditions.
- Community incentives, event rewards and promotional programs.
- Public multi-chain asset presence for wallets, trackers and exchange review.

Important Note

This document does not promise guaranteed returns, guaranteed price stability or guaranteed revenue. USDG Gold should be reviewed as a digital asset ecosystem with market risk, product risk and execution risk.

Market Presence & Liquidity

SNAPSHOT

Arbitrum market snapshot from uploaded materials

\$300K+

Arbitrum liquidity snapshot

~\$1

price range snapshot

44

24h tx snapshot

The Arbitrum liquidity screenshot shows a liquidity snapshot above \$300,000. This should be presented as a point-in-time market snapshot, not a guarantee of future liquidity, volume or price behavior.

Security Overview

TRUST LAYER

Dessert Finance Audits

Audit materials are included for the Ethereum and BNB Chain deployments. They support public review of contract behavior, supply, decimals and security checklist items.

Blockaid Review

Blockaid email confirmations in the archive show that previous contract flagging was reviewed as incorrect and modified accordingly.

Verified Contracts

The security narrative should focus on verified source code, simple token mechanics and the absence of hidden transfer restrictions according to supplied audit materials.

- No minting function reported in audit highlights.
- No blacklist or whitelist mechanics reported.
- No pause function reported.
- No transfer tax or fee logic reported.
- No proxy or upgradeable behavior reported.

Blockaid Verification

FALSE-POSITIVE REVIEW RESOLVED

The uploaded Blockaid confirmation screenshots should be presented carefully: they are evidence that previous flagging was reviewed and modified after investigation. This is not a broad investment endorsement; it is a security-metadata clarification supporting user confidence and platform review.

- BNB Chain contract review confirmation included in archive.
- Ethereum contract review confirmation included in archive.
- Arbitrum contract review confirmation included in archive.
- Recommended wording: previous flagging was incorrect and modified accordingly after review.

SECURITY CORRESPONDENCE

The screenshot displays an email client interface. On the left is a sidebar with navigation options: Compose, Mail, Contacts, Settings, Dark mode, and About. The main area shows an email from support@usdgdefi.com. The email title is "[Blockaid] Re: API Report Address on 0x5b6d884174853f2c2d1a98b406c3b44f411d3cbc". The email body contains the following text:

Dear support,
We have completed our review of your appeal regarding the flagging of 0x5b6d884174853f2c2d1a98b406c3b44f411d3cbc

After a thorough investigation, we have found that the flagging was indeed incorrect, the flagging has been modified accordingly.
We apologize for any inconvenience this might have caused and appreciate your understanding as we strive to maintain the highest security standards.

Thank you for your patience and cooperation.

Best regards,
Blockaid Security Team

USDG Fortuna Overview

LIVE PRODUCT

Wheel interface

Product Summary

USDG Fortuna is a Telegram Mini App rewards product built around daily free spins, bonus spins, premium spins, weekly points, Silver Lottery and Gold Lottery participation.

Business Model

Free engagement builds user activity, while paid premium packages and direct lottery participation provide a revenue path for the ecosystem.

Access

Users interact through the Telegram bot and Mini App interface.

Fortuna Wheel Mechanics

GAMEPLAY

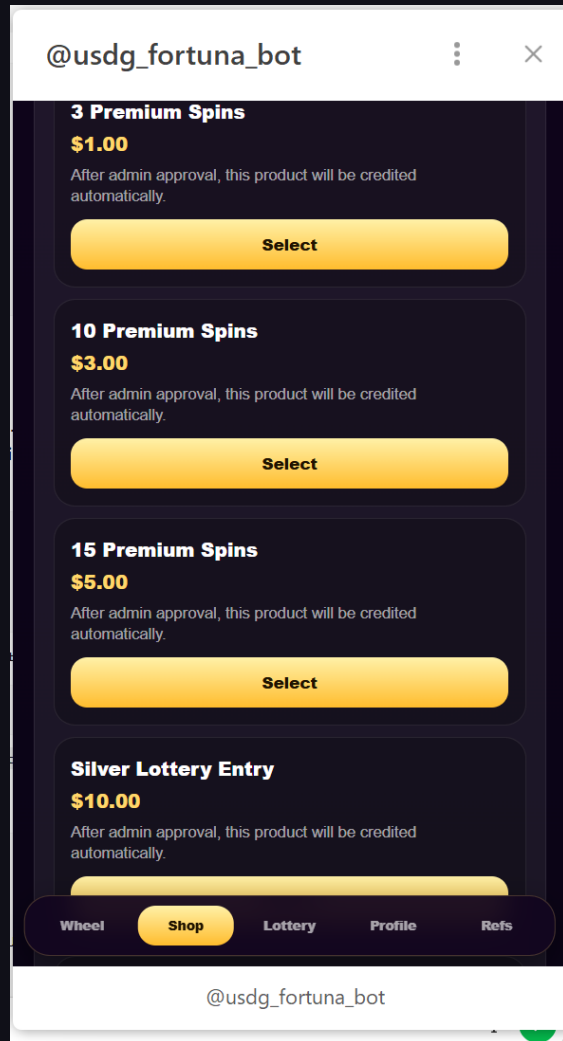

Daily wheel screen

Core Flow

- Users receive 5 daily free spins.
- Free and bonus spins use the normal reward wheel.
- Shop-approved purchases create premium spins.
- Premium spins are intended for Premium Wheel access only.
- Weekly points determine Silver and Gold lottery eligibility.

Premium Shop

REVENUE LAYER

Shop interface

Premium Packages

\$1 = 3 premium spins \$3 = 10 premium spins \$5 = 15 premium spins

Manual Approval

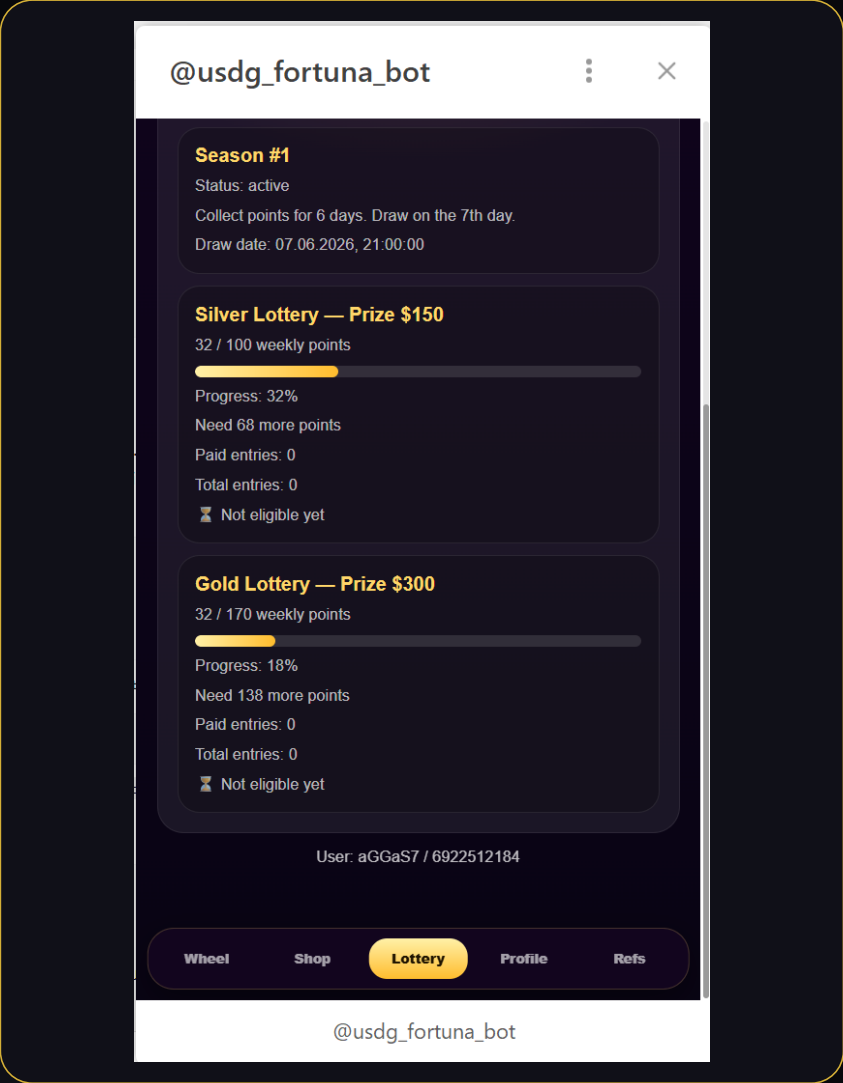

Users pay to the official wallet and submit a transaction hash. Admin approval credits the purchased package to the user account.

Separation Rule

Premium spins are reserved for users who purchased through the Shop and were approved by admin.

Silver & Gold Lottery

WEEKLY SEASON

Lottery interface

100

Silver points

170

Gold points

Weekly Draw Model

Users collect weekly points during the active season. Silver Lottery and Gold Lottery qualification thresholds create a clear progression path. Season #1 materials reference example prize targets of \$150 for Silver and \$300 for Gold.

Profile & Rewards

USER ACCOUNT

Profile interface

Visible User Metrics

- Weekly points and total points.
- USDT balance display.
- Free spins, bonus spins and premium spins.
- Lottery eligibility and progress indicators.
- User identity and Telegram-based account data.

Referral System

GROWTH ENGINE

Referral interface

Referral Logic

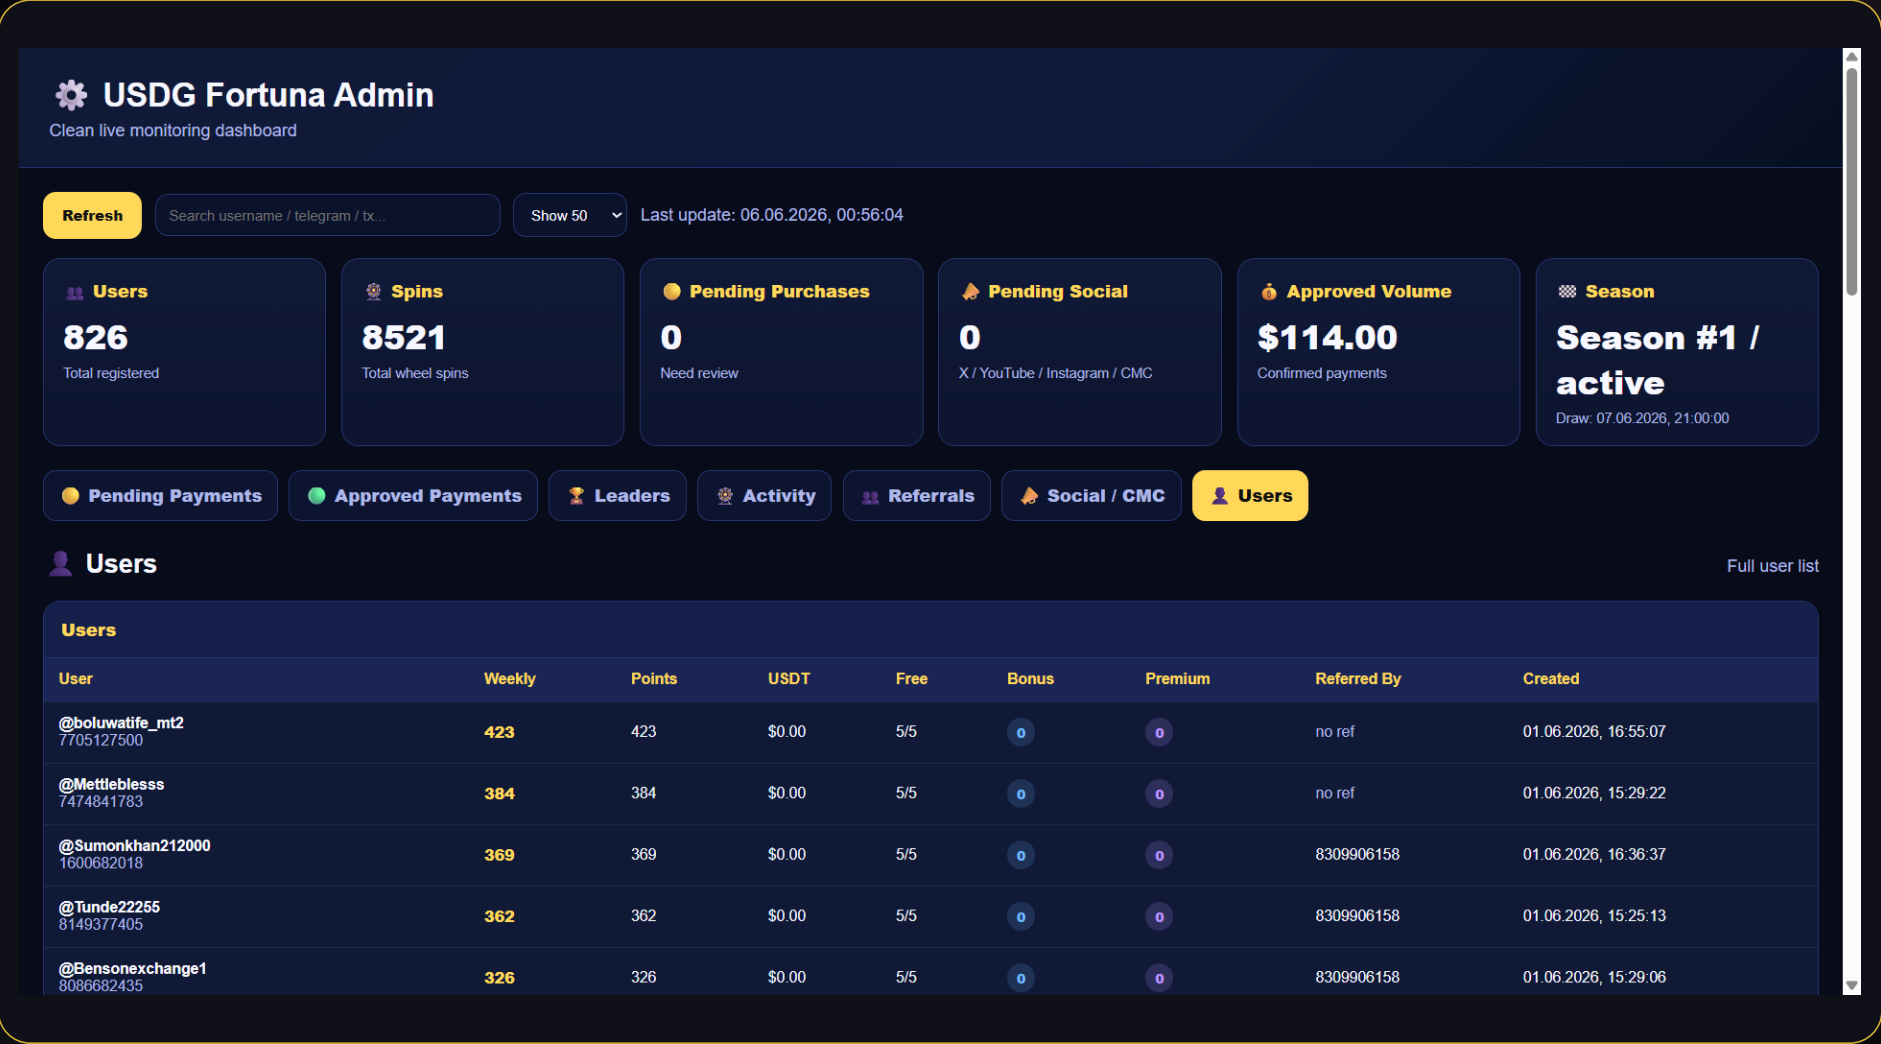

Referral rewards are intended to reward active users, not inactive signups. A referral becomes valuable only when the referred user completes the required activity threshold.

Sustainable Rewards

Bonus spins are better suited for referral and social rewards because they use the normal wheel instead of granting Premium Wheel access for free.

Fortuna Admin Dashboard

OPERATIONAL TRANSPARENCY

Dashboard snapshot includes users, spins, pending submissions, approved volume, active season and leaderboard data. These metrics are snapshots and should be updated before each official submission.

Operational Metrics Snapshot

FORTUNA

826

users

8,521

spins

\$114

approved volume

#1

active season

Interpretation

The purpose of these metrics is to show that USDG Fortuna is not only a concept. It has live UI screens, admin monitoring, user activity tracking, purchase approval workflows, social task review systems and weekly season logic.

USDG Tap Ecosystem

TAP-TO-EARN BRANCH

USDG Gold Manager Bot promotion

USDG Tap

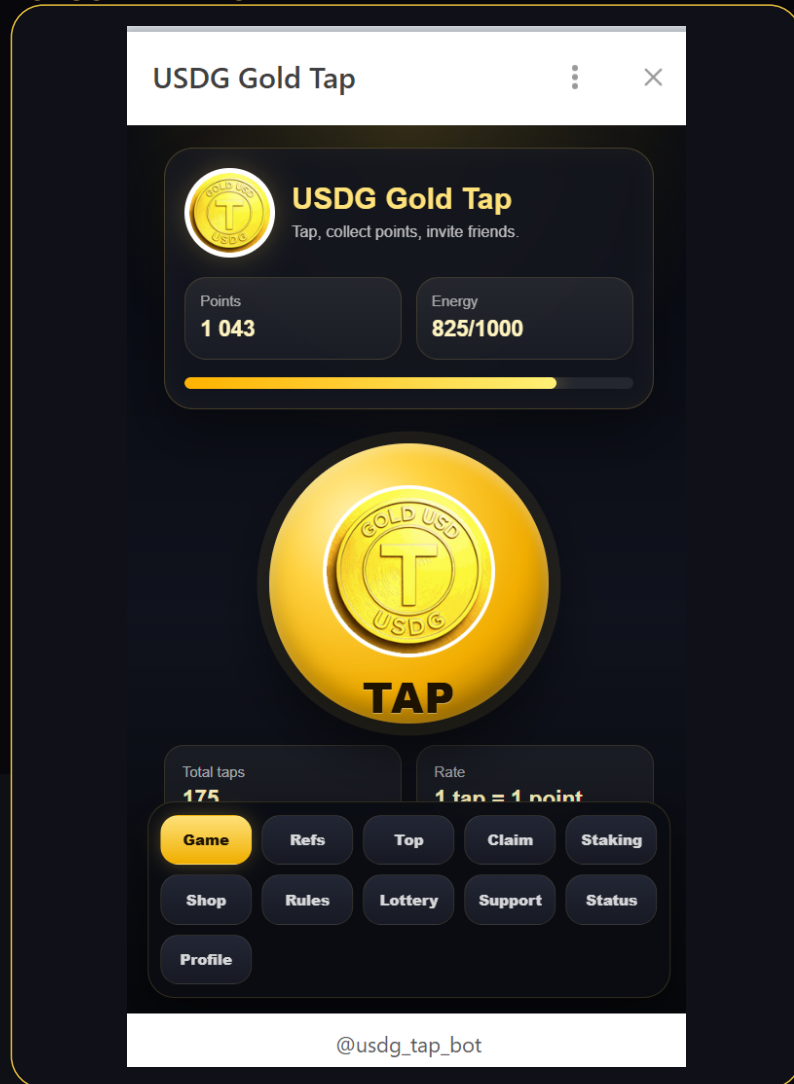

USDG Tap is the tap-to-earn branch of the ecosystem. It is designed for onboarding, point collection, leaderboard competitions, referrals and future integration with USDG Gold holder-based access.

Future Relaunch Direction

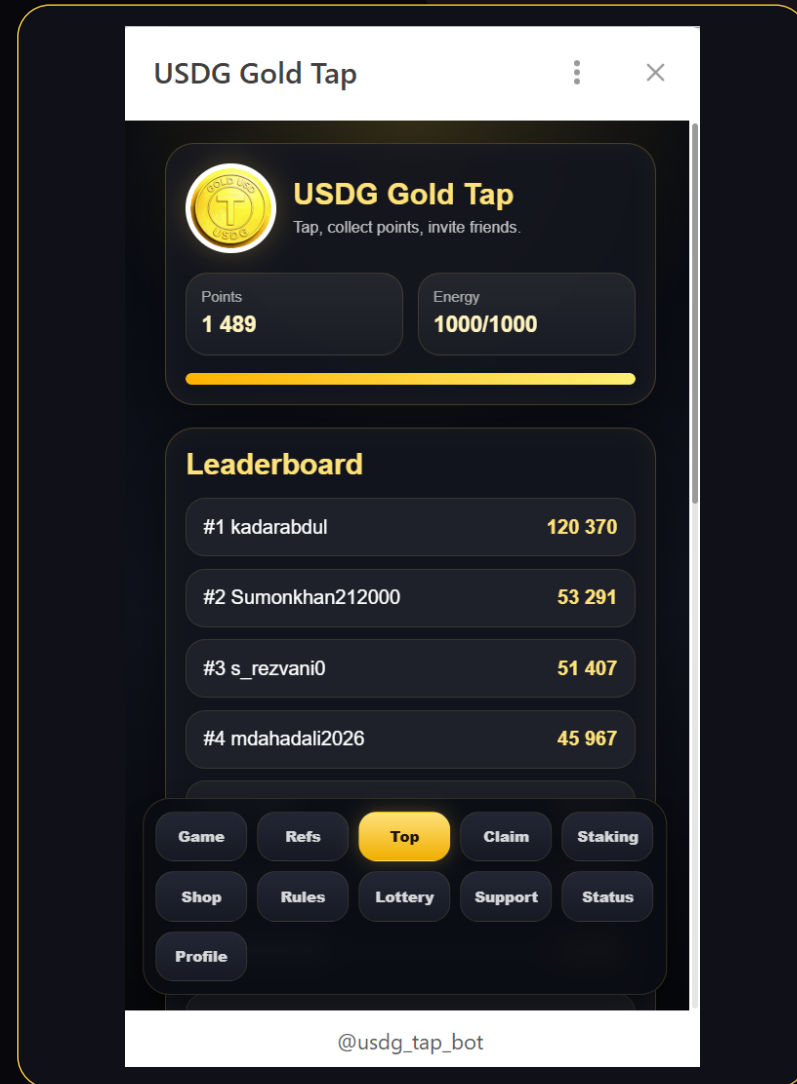

The planned model links Tap access to USDG Gold holding requirements, reducing farming risk and improving alignment between gameplay and token ecosystem value.

USDG Tap Interface

Roadmap 2026-2027

EXECUTION PLAN

Q3 2026

Fortuna refinement, weekly lottery growth, social campaigns, GitHub documentation expansion.

Q4 2026

Tap relaunch planning, holder-access model, platform review submissions and exchange outreach.

Q1 2027

Additional utility modules, community governance pilots and broader wallet/tracker integrations.

Q2 2027

Cross-product ecosystem integration, improved analytics and expanded partner campaigns.
